PROFESSIONAL SUMMARY

Graduate Software Engineer with hands-on experience in full-stack development, building modern web applications using React, JavaScript, C#, and .NET technologies. Completed all academic requirements of a Bachelor of Software Engineering (Professional) except final industry internship.

Skilled in designing scalable applications, integrating REST APIs, and working with cloud technologies such as AWS. Experienced in Agile environments with a strong focus on problem-solving, debugging, and delivering reliable software solutions.

Strong interest in software development, cloud systems, and secure, high-performance application development.

CORE SKILLS

Programming Languages: C#, JavaScript, TypeScript, Java, C++, Swift

Frontend Development: React.js, HTML5, CSS3, AJAX, jQuery, Bootstrap, Axios, Redux Toolkit

Backend Development: .NET Core, ASP.NET Core MVC, ASP.NET Core Web API, GraphQL, REST APIs, LINQ, EF Core

Databases: SQL Server, MySQL, SQLite, MongoDB

Cloud Technologies: Azure App Service, Azure Static Web Apps, GitHub Pages, AWS (EC2, S3, API Gateway)

Tools & Practices: Git, GitHub, Visual Studio, Agile, Debugging, Testing, API Integration, Version Control, Postman

Testing: JUnit 5, Selenium, JMeter, Unit Testing, Performance Testing

PROFESSIONAL EXPERIENCE

MVP Studio – Melbourne (Project Experience)

Nov 2025 – Present

- Developed full-stack web application features using React.js, JavaScript, C#, and ASP.NET Core.
 - Built and updated frontend components for project modules using React, Bootstrap, Axios, and Redux Toolkit.
 - Created and integrated REST API endpoints to connect frontend pages with backend services.
 - Worked with Entity Framework Core, LINQ, SQLite/SQL Server, and MongoDB for data access and management.
 - Implemented CRUD functionality for core entities including customers, products, stores, and sales.
 - Debugged frontend, backend, API, and database issues during development and testing.
 - Used Git/GitHub, Postman, Swagger, and Visual Studio/Rider as part of the development workflow.
-

PROJECTS HIGHLIGHTS (<https://sahib-11.github.io/#projects>)

Midian Gaming Website

Link: <https://www.midiangaming.com.au/>

Technologies: HTML5, CSS3, Bootstrap, JavaScript, GitHub Pages

- Designed and deployed a responsive real client website for a gaming business/community.
- Built sections for timetable display, game/media content, carousel images, and social media links.
- Used Bootstrap and JavaScript to create a responsive layout across desktop and mobile devices.
- Deployed the website using GitHub Pages with a custom domain setup.

Soil – Online Grocery Store

Technologies: React, Node.js, Express, Sequelize, MySQL, GraphQL, Apollo

- Developed an online grocery store application for browsing products, managing carts, and supporting purchase workflows.
- Built a React frontend connected to a Node.js and Express backend with MySQL data storage.
- Used Sequelize for database modelling and backend data operations.
- Created an admin module using React, GraphQL, and Apollo Server for managing store functionality.

CrimeLocator (iOS App)

Technologies: Swift, SwiftUI, iOS, JSON Data, Mobile UI

- Developed an iOS application that helps users view crime-related information for suburbs and neighborhoods.
- Built SwiftUI screens for home, search, suburb details, recent activity, watch zone, and settings.
- Implemented local data models for users, reports, suburbs, and locations.
- Designed mobile UI flows for searching suburbs, viewing reports, and managing saved locations.

StoreAdmin (Full-Stack Admin Dashboard)

Technologies: C#, ASP.NET Core Web API, Entity Framework Core, SQLite, React, Redux Toolkit, Bootstrap, JavaScript

- Developed a full-stack admin dashboard for managing customers, products, stores, and sales with complete CRUD functionality.
- Built RESTful API endpoints using ASP.NET Core Web API, Entity Framework Core, and relational database models.
- Designed responsive React frontend components with Redux Toolkit for state management and dynamic UI updates.
- Implemented form validation, modal-based create/update flows, and frontend-backend API integration.

MCBA Internet Banking System

Technologies: C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, Bootstrap, JavaScript

- Developed a full-stack internet banking web application using ASP.NET Core MVC and a layered architecture.
- Implemented banking features including deposits, withdrawals, transfers, transaction history, and scheduled bill payments.

- Designed and integrated relational database models using Entity Framework Core and SQL Server.
 - Built authentication, session handling, validation rules, and backend logic for secure banking operations.
-

EDUCATION

Bachelor of Software Engineering (Professional)

All academic requirements completed

Certificate III – Information, Digital Media and Technology

ADDITIONAL TRAINING

- Java Programming Bootcamp
 - C++ Programming Bootcamp
-

TECHNICAL INTERESTS

- Full-stack application development
 - Software architecture and system design
 - Secure and reliable software systems
 - Emerging technologies and continuous learning
-

STATUS

Australian Citizen
