PROFESSIONAL SUMMARY

Graduate Software Engineer with hands-on experience in full-stack development, building modern web applications using React, JavaScript, C#, and .NET technologies. Completed all academic requirements of a Bachelor of Software Engineering (Professional) and currently gaining industry experience through a Software Developer Internship.

Skilled in designing scalable applications, integrating REST APIs, and working with cloud technologies such as AWS. Experienced in Agile environments with a strong focus on problem-solving, debugging, and delivering reliable software solutions.

Strong interest in software engineering, cloud systems, and secure, high-performance application development.

CORE SKILLS

Programming Languages: C#, JavaScript, TypeScript, Java, C++

Frontend Development: React.js, HTML5, CSS3, JavaScript (ES6), AJAX, jQuery

Backend Development: .NET Core, ASP.NET Core MVC, REST APIs, LINQ

Databases: SQL, MySQL, MongoDB

Cloud Technologies: AWS (EC2, S3, API Gateway)

Tools & Practices: Git, GitHub, Visual Studio, Agile, Debugging, Testing, API Integration, Version Control

PROFESSIONAL EXPERIENCE

Software Developer Intern

MVP Studio – Melbourne

Nov 2025 – Present

- Develop and enhance web applications using React.js and modern JavaScript (ES6)

- Support backend development using C# and .NET Core
 - Work with MongoDB and LINQ for efficient data management
 - Assist in implementing real-time features using SignalR
 - Integrate AWS S3 cloud storage into application functionality
 - Participate in debugging, testing, and improving system performance
 - Collaborate with developers within Agile development workflows
-

PROJECTS

Cloud-Based Application

Technologies: AWS EC2, S3, API Gateway

- Designed and deployed a cloud-hosted application using AWS services
- Implemented API communication between distributed services
- Utilised AWS S3 for scalable data storage
- Demonstrated understanding of cloud architecture and distributed systems

Full-Stack Web Application

Technologies: React, JavaScript, REST APIs

- Developed a responsive web application using React
- Built reusable UI components supporting scalable frontend architecture
- Integrated REST APIs to retrieve and display dynamic data
- Focused on performance optimisation and clean UI design

Real-Time Application Features

Technologies: C#, .NET Core, SignalR

- Implemented real-time communication features using SignalR
- Improved application responsiveness and user interaction
- Applied event-driven development concepts

Software Engineering Project Development

- Designed and developed software projects from concept to deployment
- Applied object-oriented programming and software design principles
- Built full-stack applications integrating frontend, backend, and databases
- Implemented RESTful APIs and real-time features
- Conducted testing and debugging for reliability and performance
- Produced clear technical documentation

EDUCATION

Bachelor of Software Engineering (Professional)

All academic requirements completed

Certificate III – Information, Digital Media and Technology

ADDITIONAL TRAINING

- Java Programming Bootcamp
 - C++ Programming Bootcamp
-

TECHNICAL INTERESTS

- Full-stack application development
 - Cloud infrastructure and scalable systems
 - Software architecture and system design
 - Secure and reliable software systems
 - Emerging technologies and continuous learning
-

STATUS

Australian Citizen

Eligible for Government Security Clearance
